

Smooth Exterior White Putty

Technical Data Sheet

The specific range in powder form

White cementitious putty in powder form to create an extremely smooth finish. Suitable for levelling plaster and concrete, cured cement plasters and Predalles.

INTENDED USE

For interior and exterior cured plasters in general for both vertical surfaces and ceilings, exposed concrete, precast reinforced concrete.

SURFACE TREATMENT

The substrate must be stable, non-chalking, clean from all traces of dust. Powdery plaster must be consolidated with a suitable primer. Moisten the surface before application.

APPLICATION

Mix the contents of each 1 kg pack with 400 ml of water to get a smooth paste free of lumps. Allow to stand 10'. Apply the putty with a trowel. Wait for 1 to 3 hours before the application of the second layer. Finish with a metal trowel for a smooth finish.

ADVICES

Do not apply below 5 ° C and above 40 ° C. Do not apply in conditions of strong wind and under full sunshine. Do not use on gypsum plaster.

PAKAGING

1kg, 5kg
